**Subject:** comment on MS settlement

I think the case has gone on long enough and should be settled. As an ordinary average citizen and novice computer user, I have to wonder if this case was more about using the courts to help Microsoft competitors put Microsoft out of business than of justice. If it weren't for Microsoft products designed the way they are, I would not be able to use a computer. Microsoft is a great American company which contributes to the economic health of the USA.
